AIM:

To create a web page using css.
To create a web page using all the css tags.

PROCEDURE:

● The coding begins with head tag where the title of the web page is written.
● In the head tag itself style tag is included where the background image,font
size,font style, favicon are included.
● The head tag is closed.
● Then its started with body tag where the navigation bar , buttons and the main content are included.
● The body section is added with the logo by the img tags
● The CSS file is linked and used to animate and for the editing propose
● Finally the body tag and the html is closed starting the end of the coding.

CODING:
